The State lottery of Austria-Hungary last year netted a profit of 8,000,000 florins.

Queen Victoria is to celebrate her birthday on May 24th, instead of the nearest Saturday thereto.

The anti-missionary riot in Smyrna was caused by a naturalized American preaching against the Greek church.

There are indications of the passenger traffic to the United States and Canada being exceptionally brisk this season.

A tribunal at Odessa sentenced Lieutenant Goreff to eight years' hard labor in the mines of Siberia, for distributing revolutionary circulars.

Taunton, in Somerset, is now completely illuminated by the electric light instead of gas, this being the only town in England at present thus provided.

Sir Thomas Martineau, the Mayor of Birmingham, who was knighted by Queen Victoria on her recent visit to that city, is a nephew of Harriet Martineau.

An Attempt to Escape.

The San Francisco Chronicle says: A guard reported to Captain Aull, the Captain of the yard at San Quentin Prison, on Thursday morning, that an attempt to escape had been made during the night by two prisoners named Lee and Lane. One of the men is a life prisoner for murder, and the other is serving out a twenty years' term of imprisonment for forgery. An inspection of the cell occupied by the two men showed that they had cut a piece of the boiler-iron plate nearly out of the door of the cell, and in a short time longer would have been at large in the yard. The iron was cut with a drill which one of the men had secured in the shop where both are employed. By drilling holes so close together that the peripheries joined they succeeded in making a continuous cut. It is supposed that they hoped to scale the sixteen-foot wall surrounding the prison and in that way gain their liberty.

Daylight surprised them and the daily inspection of the cells revealed their work. The case will be reported to the Board of Prison Directors at its next meeting.

Could Make His Wants Known.

A Washington paper says: Among the guests at an afternoon tea given last week by a prominent society woman was the Chinese minister with several attaches and the young son of one of the secretaries. The little fellow was, of course, the center of attraction, especially with the younger members of the receiving party, one of whom finally said to him: "Can you speak English?" "Yes, a little," he replied. "Let me see how much you know, then; what can you say?" At this a smile broke over the child's face as he looked archly up at his questioner and said: "I know enough to say I would like some ice cream."

To Keep Tools from Rusting.
The following preparation applied to the surface will prevent any rusting on plows or any other metal surface. Melt one ounce of resin in a gill of linseed oil, and when hot mix with two quarts of kerosene oil. This can be kept on hand and applied in a moment with a brush or rag to the metal surface of any tool that is not going to be used for a few days, preventing any rust, and saving much vexation when the time comes to use it again.

The Czar's Horses.

In his stables at St. Petersburg the Czar of Russia maintains 500 selected horses, as fine as there are in the world. Two of these were badly injured while drawing the Czar's carriage, under which the nihilists fired a bomb. They are now lame and useless, but are stabled luxuriously, attended constantly by four grooms, and blanketed with down cloths of quilted silk.

WEDNESDAY APRIL 20, 1887

A great invention in photography is just reported from Paris. It is a very powerful instrument, which, by the use of a very sensitive plate, photographs accurately and records them for observation stars now visible to the naked eye. Says a New York Cable Service dispatch of the 16th instant:

These photographic reproductions of the heavens will enable astronomers to give all of the time that they need to the accurate study of the relations of the astronomical bodies, and will certainly result in greater accuracy of astronomical observations. By prolonging the exposure of the plates in this wonderful instrument for one hour and a half photographs of a star of the sixteenth degree, which is visible only through the most powerful glasses, are recorded. Not only are these ordinarily hidden stars revealed, but through this revelation astronomers will be able to determine exactly their parallaxes and to measure absolutely their respective distances from each other.

The additions which will be made to the chart of the heavens under this new process are very great. For instance, on one of the ordinary charts representing the present advance of the science, where there are only 170 stars recorded, the photographs of the Heuy Brothers record more than 5,000. This development in the direction of photographing the heavens is regarded by scientific men as one of the most important discoveries in exact science made during the century.

That the tariff question requires a comprehensive and far-reaching mind to grasp it properly is evident to anyone who has given it study and thought. The monopolists of the country, it is safe to presume, are not doing anything more than is required of them to make the question simple so that it can be acted upon intelligently by the National Congress. We clip the following from the Mauch Chunk (Pa.) Democrat:

The iron ore miners at Guth's station, Lehigh county, have just had their wages increased from 90 cents to \$1 a day. This makes the cost of mining about fifty cents per ton average, while the protective tariff is only fifteen cents per ton. Billy Bowden ought to rise and explain where and how the protection for the laborer comes in. It is hard to believe it possible that workmen of average common sense can continue to be deceived by political demagogues who, in face of these facts, persistently assert that the high monopoly tariff on iron ore protects labor and increases wages. These very same laborers are as poor as the very poorest paupers under the meanest Government of Europe. In most of the other mines of Lehigh county the miners yet work for less than one dollar a day—some getting only seventy to eighty cents.

"Exploring the interior of the earth on a gigantic scale seems to be the great idea just now of scientific men," says the London Graphic. "The well-known Persian scientist, M. Camille Flammarion, suggests that a hole several thousands of yards deep should be excavated in the earth in order to furnish accurate knowledge as to the composition of the interior of the globe. Let the European Government, he proposes, lend all their troops to carry out this colossal work, and by so doing two grand ends would be gained, the mystery under our feet would be revealed, while soldiers would forget how to fight."

The British Government has, it appears, at last aroused itself to the fact that the hog policy on the part of its colonies may cause troubles which it is not prepared to encounter. With the East on its hands the Salisbury Ministry is not at all ambitious to prosecute a fisheries dispute in the West.

It has been demonstrated that the accumulation of capital in England is so steady and rapid, despite the talk of depression, that for the first time in history investors are satisfied within 3 per cent. over the income tax.

Chicago divorcees are not always met with approval, but the news that the Chicago labor party has divorced itself from the Anarchist element will find no objectors except among the outcasts.

If there is anything more for current reports to charge against Kinsane, it will apparently necessitate the addition of a lot of new crimes to the calendar.

PRESS DISPATCHES TO THE GAZETTE

Findings Disapproved.

WASHINGTON, April 20.

The President has disapproved and set aside the findings and sentence of the Court Martial in the case of Second Lieutenant Benj. S. Weaver of the First Infantry. Lieutenant Weaver was charged with conduct unbecoming to an officer and a gentleman, in uttering fraudulent checks, neglecting to repay borrowed money, absence without leave, making false statements, using a fictitious name, disobedience of orders and conduct to the prejudice of good order and discipline in transferring his pay account before it became due. To the last specification the Lieutenant pleaded guilty, and the court, which met at the Presidio at San Francisco, found him guilty of the charges of neglecting to pay his debts, of falsely stating that he was absent on leave, of absenting himself without leave, disobedience of orders and of transferring his pay account. The sentence of the court was that Lieutenant Weaver be dismissed from the service. The President's reasons for disapproving this sentence is the fact that two members of the court were improperly discharged during the trial and that then if the findings were sustained, there is testimony before him tending to show such absence of wilful intent to offend against the military law of the army regulations, and that a sentence less severe than dismissal would abundantly subserve the ends of discipline and sufficiently vindicate the wholesale strictures of army regulations.

Found Guilty of Murder.

CHICAGO, April 20.

After being out five hours and ten minutes, one hour of which was spent at supper, the jury in the Schwartz-Watt Rock Island murder trial were ready with the verdict. Before they had time to appear before the Judge, the court room had filled with spectators, many ladies being present. A deathlike silence prevailed, when the Judge taking the verdict and read aloud the words pronouncing Watt and Schwartz guilty of murder, and sentencing them to imprisonment in the Penitentiary for life. The verdict was received by the prisoners without a look or action of surprise. They were quietly taken to their cells, and to-day their attorneys will enter a motion for a new trial. This motion will doubtless be overruled, and then a notice will be given of an appeal, and in all probability a stay of proceedings and a hearing in the upper courts will follow.

No Opinions Without Authority.

MADISON, Wis., April 19.

General Order No. 12: Posts of the Grand Army of the Republic are requested not to comply with any request for their opinions as a post on any subject unless such action shall have the approval of National and Department headquarters. Further orders on this subject will soon be issued.

By command of Lucius Fairchild, Commander in Chief.

A Consolidation Scheme.

NEW YORK, April 20.

At a meeting of the Life Insurance Association yesterday, the subject of uniting all similar organizations throughout the country into a national society was informally and favorably discussed. It will probably be further considered at the annual dinner of the New York Association today, when a wide representation of Life Insurance organizations will be brought together.

Booth's Popularity.

DENVER, April 20.

Edwin Booth made his first appearance in Denver at the Tabor Grand Opera House last night in Richelieu. The sale of seats for the week's engagement have been enormous, everyone being taken on the first two days the box office was open. The receipts last night were over \$3,000, which is the largest of any opening night of Booth's present season.

The Panhandle Robbers.

PITTSBURG, April 20.

The preliminary hearings in the postponed Panhandle railroad robbery cases came up this morning. All the prisoners waived preliminary examinations and were held for trial. The cases will probably be tried during the present term.

Dividing Their Profits.

CINCINNATI, April 20.

The firm of Proctor & Gamble have arranged to divide the profits of the firm among their employees every six months, after allowing the proprietors reasonable salaries and six per cent. on the capital invested.

Armed Anarchists Disband.

CHICAGO, April 19.

The International Working People's Association, which was the central body of the armed section of the An-

archists, known as the Lehr Wehr Verein, has disbanded and the formidable organization which filled the history of the Western metropolis for the year 1886 with terror and excitement is no more.

At a meeting of the groups at which this action was taken, it was argued that the time for international groups had passed, and that the organization could not exist for the sole purpose of giving rogues an opportunity to earn their living as spies. The fact of its being known that quite a number in the organization were acting as spies, thus endangering not only the men in the hall, but members of the organization generally, was the most potent factor in causing the dissolution.

A Naval Officer Suicides.

ANNAPOLIS, Md., April 20.

Lieutenant John W. Dannerhauer, the Arctic explorer, shot and killed himself at the Naval Academy this morning. He had mental trouble after he came back from the Arctic regions. He was found lying on his rug in front of his fireplace, with a tag tied to his buttonhole, saying: "Send to my brother at Washington." Although he had some trouble since he returned from the Arctic regions, what immediately led to his suicide, is thought to have been the recent grounding of the Constellation, on its way to Norfolk, which he had charge of, and for which it is supposed he had fears of being court-martialed. Furthermore, he was very intimate with young Robert W. Gatewood, who recently committed suicide on the Carolina, and whom he saw in death. It is supposed this death suggested the mode to him. His wife, formerly Miss Sloane, of New York, is away with her parents. Lieutenant Dannerhauer leaves two children; he was about 35 years old, and an intelligent and polished officer.

A Long Haul Complaint.

WASHINGTON, April 20.

E. M. Herrick, President of the Pacific Pine Lumber Co., and E. C. Williams, President of the Redwood Manufacturing Association, of San Francisco, have telegraphed the Inter-State Commerce Commission as follows: "Our two corporations, employing about 8,000 to 10,000 men, and about \$30,000,000 capital, have addressed you by mail, stating that our eastern business has been entirely destroyed by the operation of law, and asking your intercession in our behalf. Meanwhile will you allow the roads over which we have been operating, to give the old rates, and so revive our business with the East, provided the rate is open and available for all?"

A Lost Draft.

NEW YORK, April 20.

In the columns of the morning papers there appeared to-day an advertisement for a \$75,000 draft which has been lost or stolen. It was a draft of the Bank of North America, Philadelphia, on the bank of the New York National Banking Association to the order of Dunn Brothers. Payment has been stopped.

FOREIGN DISPATCHES

A Conciliatory Dispatch.

LONDON, April 20.

It is officially stated that Lord Salisbury's dispatch sent to Washington on March 24th, said that the British Government understands the action of the United States in denouncing the fishery articles of the treaty of Washington, to be in a great degree the result of disappointment at being called upon to pay eleven hundred thousand pounds under the Halifax fisheries awards. It offers to revert to the old condition of affairs without pecuniary indemnity, which offer it trusts, will commend itself to the American Government as being based upon that spirit of good will and generosity which should animate two great and kindred nations whose common origin, language and institutions constitute so many bonds of amity and concord.

WASHINGTON, April 20.

The Secretary of State declines to either confirm or deny the statement cabled to London, to the effect that Salisbury has sent a dispatch to this government on the subject of the fisheries, offering to revert to the old condition of affairs without pecuniary indemnity. Bayard also declines to express any opinion with regard to the subject matter of the dispatch as cabled.

Seized With Fear.

ST. JOHNS, April 20.

Sarah House, who fled from Boston in the early part of last week, after sending her lady depositors out of \$50,000, has been living here for several days. On Saturday she engaged a fashionable residence house, which adjoins the residence of President McLellan, of the suspended Maritime bank, whose furniture and outfit she proposed to purchase. Her identity being discovered however, she was seized with fear and took last Tuesday night's train for Canada.

The Prince of Wales will start the jubilee yacht race from the south end pier.

The Colonial conference yesterday took up the consideration of Canada's proposal for the establishment of an alternative mail route to and from China and Australia, via the Canadian Pacific railway. The discussion was adjourned until to-day.

The Czar's Enemies Sentenced.

ST. PETERSBURG, April 20.

Six of the men arrested for complicity in a plot to assassinate the Czar, which was to have been carried out on the 13th of March, have been sentenced to death. The other conspirators have been sentenced to imprisonment for life.

The Times' Charge.

LONDON, April 20.

Several Gladstone Liberals desire Parliament to issue a summons to the editor of the Times, calling him before the bar of the House of Commons to answer for a breach privilege in accusing Parnell and other members of

the House with complicity in crime, or that Gladstone propose the appointment of a committee to examine the Times' charges. The Parnellites have been consulted, and their leaders oppose both propositions. If neither Parnellites or Gladstonites take the initiative in moving for an investigation it is probable that an independent motion will be made which both the Government and the Liberal Union members will support.

Beaten by one Vote.

HALIFAX, April 20.

A special cable dispatch from St. Johns, N. F., says the bill for the total prohibition of the liquor traffic in that Colony was defeated in the Assembly by the casting vote of the Speaker, but that it certainly will be carried at the next session.

The "Times" to be Sued.

LONDON, April 20.

The London Globe of this evening said that Biggar will sue the Times for libel and make that paper's article on "Parnellism and Crime," of a series of which the Parnell letter was the culminating part, the basis of the action.

Killed by One of His Men.

LONDON, April 20.

A dispatch from Mandalay says that Dacot, the leader at Hiao, has been killed by one of his own tribe, and that the villagers are rejoicing over his death.

WESTERN DISPATCHES

A Queen at the Bay.

SAN FRANCISCO, April 20.

Queen Kapoline, of the Hawaiian Kingdom, arrived this morning from Honolulu on the steamer Australia. She was accompanied by Princess Liliuokalani and a number of high officials of the Hawaiian Government. The principal object of the Queen's visit is to be present at Queen Victoria's jubilee celebration in London in June next. The royal party will remain here about a week, when they leave for Washington to pay their respects to the President and Mrs. Cleveland. After a short stay at the Capitol, they will proceed to New York, thence to London. Before returning, Queen Kapoline will also visit the principal cities. She has never before been outside of her Kingdom.

Freight Rates.

SAN FRANCISCO, April 19.

The comparative freight tariffs of the Southern Pacific Company and the Canadian Pacific Company, printed here, shows that, owing to the Inter-State Commerce law, the latter company can make the rate from San Francisco to Chicago and from common points much less than the former. The difference in favor of the Canadian Pacific ranges from \$4 to \$18 per car load, according to the class of freight.

How They Make Room.

The Norristown Herald says: We are told that all the fifty millions of people of this country could be put into the State of Texas without crowding. This is because they have a habit in Texas of suspending persons from trees and telegraph poles. This makes more room below.

Neither Will Yield.

The printers' strike is still in progress at San Diego. About twenty-four men are affected. The Sun, Union and San Diegan got out on time all right yesterday. The papers assist each other, editors and reporters being pressed into service. Neither party will yield.

LOCAL NEWS.

Happenings of the Day in Reno and Vicinity.

Reno's New Water Company.

A meeting of the Trustees of the Reno and Hunter Creek Water Company was held at the office of the new corporation on Virginia street yesterday afternoon, the following being present: D. A. Bender, J. B. Overton, J. C. Hampton, Wm. Thompson and James Mayberry. Notary Public Fish administered the requisite oath to the members of the Board, when they at once proceeded to organize by the election of the following officers: President, J. C. Hampton; Vice-President, D. A. Bender; Secretary, Wm. Thompson; Superintendent, J. B. Overton; Treasurer, First National Bank. On motion of Mr. Overton, it was resolved that the Secretary and Vice-President be by the Board appointed a committee to examine, pass upon and receive the title deed to the property to be conveyed to the company by Mr. Mayberry. Upon motion, the Secretary and Vice-President were ordered to procure a stock-book and other necessary books for the company. The meeting then adjourned subject to the call of the Vice-President and Secretary.

Fine Barber Shop and Baths.

The walls and ceiling of Belz's barber shop are being beautifully papered, and the establishment looks up as one of the handsomest in town. Not content with this radical improvement, Belz is also putting new and elegant porcelain-lined tubs in his bath rooms. It is evident he is determined not to be outdone by competitors in the way of accommodations for patrons.

Sir Knights, Attention!

You are hereby ordered to appear at your armory in full dress uniform at 12 o'clock noon sharp on Friday, the 22d inst., preparatory to taking the train to Virginia City at 1 o'clock P. M.

R. H. LINDSAY, Captain.

Refused to Commute.

The Board of Pardons yesterday refused to commute the death sentence of One-Armed Jim, the Indian convicted of murder in Humboldt county.

Fatal Flames.

The 13-months-old child of Frederick Spring, a rancher residing in Paradise Valley, Humboldt county, was burned to death on the night of April 17th under the following circumstances: Mrs. Spring, mother of the child, left it sitting on the floor in a room with a lighted candle on a table while she went into the kitchen attached to the premises. The child pulled the cloth from the table, bringing the lighted candle along with it to the floor. The flame from the candle set fire to a newspaper spread on the floor. The burning paper ignited the child's clothing, whose screams brought the mother to the apartment. She succeeded in extinguishing the flames enveloping her offspring from its blazing clothing, but not until fatal injuries resulted from inhaling the fire, from which death resulted in a few hours.

That Wonderful Baby.

There is said to be much talk in Washington over the President's failure to attend the christening of Secretary Whitney's baby. The American who is not fond of anglo-mania will applaud President Cleveland for the good sense he showed in not lending countenance to so silly an occasion. The assemblage of high dignitaries to witness what is usually a private ceremony was absurd and uncalled for. It is probable the heavy snub administered by the President, and the plain-spoken criticism of the press, will prevent a repetition of such a ceremony in Washington.

Chickens Should Take Warning.

The Santa Maria, Santa Barbara county, Calif., Times of the 16th says: A few days ago a remarkable flight of hawks was seen passing over the Suez ranch. They were observed in flocks of hundreds and even thousands making their way northward. Where they came from and were going no one could determine. All of the various hawk family seemed to be represented.

Old Families at a Discount.

Next year will be the centenary of the Colony of New South Wales, the first convoy of convicts having reached Botany Bay on January 20, 1788. And the colonists are now debating how to best celebrate the event. But none of them are anxious to trace their origin to these first settlers.

Something New.

A train-load of 330 cattle, from Cotulla, Texas, which had been fattened on prickly pear and cotton seed meal, sold on the Chicago market last week at \$4 25 per hundred. The cattle attracted considerable attention, from the fact that it was the first large lot of cattle ever fed that way for market.

Check Full of It.

A city girl saw a cow milked for the first time. When the pail had been filled she stepped up, stroked the sleek side of the animal and exclaimed: "Why, she's just check full of it, isn't she?"

PERSONAL.

Major Ford of Carson, was in town last evening.

W. W. Sholl and Fred Hines arrived here from Honey Lake Valley with 240 head of fat cattle.

Horace Martin, of Aurora, who has been spending the Winter in California, returned this morning on his way home.

District Attorney Huffaker, of Storey county, and his wife, were in town last night. They returned home on this morning's express train.

Judge Wells, the Governor's private Secretary, and Ernest Cary, mail agent on the C. & C. railroad, arrived from Carson on to-day's noon train.

Mrs. H. H. Sheldon, of Eutro, came in on last night's Virginia & Truckee express train and left on the overland for her beautiful ranch home in Sonoma county.

A Mining Decision.

Says yesterday's Carson Union: The decision rendered yesterday by Judge Sabin in the U. S. Circuit Court in the case of Blasdel vs. Tangerman, is upon the question whether "assessment" work on mining ground is required after payment has been made for the claim on application for U. S. patent. The decision follows the general rule that after payment the land is so far the property of the purchaser that ejectment may be maintained in the courts against trespassers. In the above case the contention was that the proceedings of Blasdel for patent to the ground are so defective that a patent cannot result from the payment and hence that he is not in a condition to maintain ejectment against the re-locators who are in possession. The Court rules otherwise. This decision is not thought to be conclusive on the question of the title, as the General Land Office is proceeding regularly to test the question why Blasdel's entry of the mining ground in Aurora shall not be canceled. Should such cancellation follow the Land Office hearing, which takes place on the 26th inst., it is thought that the judgment of the Circuit Court will not be enforced.

The Topolobampo Colony.

A Guaymas dispatch of the 18th inst. says: Dr. Schellhouse, one of the directors of the Topolobampo Colony, leaves on the Newburn tomorrow for San Francisco, and L. A. Gould, also of California, left two days ago by rail. They, with Directors Chidester, Albert Owen and others, came in from Topolobampo three days ago. Eight others came in to-day. They report that the statements made by Hawkins and his party were false; that the colony is prospering, and that since they landed in November there have been but three deaths, and that four of these were from smallpox. It is perfectly healthy there now. Those who are en route to the States are mostly going to settle up their business and intend to return with their families in Fall. Others are going to lecture upon Sinaloa and Topolobampo. Dr. Schellhouse is commissioned to lecture through California.

Detective Appliances.

An exchange says that the detective camera is so constructed that the touch of a spring starts it noiselessly in action, and is variously enclosed so as to resemble a paper-covered package, hand satchel, etc. The latest invention in this line is the "vest camera," a flat disk, shaped and sized like a pie, which is carried under the vest, the all-seeing eye of the lens doing duty as an innocent looking button.

A Submarine Disturbance.

A dispatch from San Onofre Creek, Cal., says: The storm has thrown vast quantities of marine vegetation upon the beach, covering the shore for miles from four to six feet in depth, and evidences are apparent of some great submarine disturbance. Dead fish, whales, monstrous sharks and turtles of immense size are strewn along the beach. One of the last named is ten feet long.

Why She Was Meditative.

A handsome young bride was observed to be in deep reflection on the morning of her wedding day. One of her bridesmaids observing her in a brown study, inquired the subject of her meditations. "I was thinking," she replied, "which of my old beau I would marry in case I should become a widow."

Want Their Land Back.

The Seneca Nation of Indians has brought suit in the New York Supreme Court claiming title to about 150,000 acres of land in Erie and adjoining counties in New York, on the ground that the Treaty of 1828 was not properly ratified, and that, being the wards of the nation, the time which has elapsed is no bar to action.

Youthful Assassins.

Private letters from St. Petersburg say the students who attempted recently to take the life of the Czar were mere boys. One was 18 and the other 19 years of age, while the eldest is 24.

Something New.

The Central Pacific Railroad Company is now collecting data for a book descriptive of Lake Tahoe and the surrounding country for the information of tourists.

An attempt was recently made to kidnap Birdie, the little daughter of Mrs. Theresa Fair in San Francisco, and now Mrs. Fair's residence on Pine street is guarded by patrols.

The wind of yesterday and last evening was succeeded by a nice rainfall during the night, having been the heaviest since February. About six inches of new snow is reported at Truckee.

John Quinn, the miner from Virginia City who attempted to shoot Sol. Frankel, the bankrupt broker, on the Sacramento train Sunday morning, was arrested in San Francisco yesterday on the charge of assault with a deadly weapon.

T. J. Read, a prominent surveyor of Eastern Nevada, came in from Carson last night and left on this morning's overland for the eastern part of the State and Utah, where he will make several surveys for the Central Pacific Railroad Company.

The sugar refiners of California are cutting prices with a vengeance in order to control the Pacific coast market. The prospect is that the prices will go lower, although the best granulated sugar is quoted in San Francisco at five cents per pound.

Says yesterday's Winnemucca Silver State: Ernest DuVivier telegrams from Goldcoada that there is great excitement over the Gold Run placer mines. Two white men and a large number of Chinese left the station this morning for the diggings.

The San Francisco Post says that it is reported that John W. Mackay continues to advise his friends to hold Consolidated California & Virginia shares and that the mine is looking well and that good progress is

Simple and Sure.

The following prescription for dysentery, diarrhea and all Summer complaints, is furnished by a prominent physician who used it in his practice for several years with uniform success. For adults, take one teaspoonful of Gilmore's Aromatic Wine and the same quantity of corn starch, after every discharge. For children, one teaspoonful of Gilmore's Aromatic Wine and the same quantity of corn starch. For infants under one year, ten drops of this Wine and enough corn starch to thicken it. This prescription is safe, sure and reliable. It does not leave the patient constipated, but restores to perfect health. Agent for Reno, W. Pinniger.

Afraid She Would not be Understood.

The Omaha World says:

Little Nell—"I'm awful sorry for poor Nurse."

Omaha Mamma—"Why, pet, your nurse looks well and happy."

"But the angels won't never know how good she is and maybe they'll make a mistake an' let her go to the bad place."

"Mercy me! What put that into your little head?"

"Why, she says all her prayers in French."

The Lumber Supply.

The Northwestern Lumberman estimates that the product of lumber of all kinds in the United States has risen from 18,091,356,000 feet in 1880 to 24,000,000,000 in 1886, and that three-quarters of it is consumed in cities and villages, leaving only one-quarter for farms, mines, and railroads. This of course does not include ties.

Ladies

In delicate health and all who suffer from habitual constipation, will find the pleasant California liquid fruit remedy, Syrup of Figs, more easily taken, and more beneficial in effects than any other remedy. It acts promptly yet gently on the bowels, kidneys, liver and stomach, and does not sicken or debilitate. For sale by Wm. Pinniger, Reno, Nevada.

Wonderful Cures.

W. D. Hoyt & Co., wholesale and retail druggists of Rome, Ga., say: We have been selling Dr. King's New Discovery, Electric Bitters and Bucklin's Arnica Salve for two years; have never handled any other medicine which has given so much universal satisfaction. There have been more wonderful cures effected by these medicines in this city, several cases of pronounced consumption have been entirely cured by use of a few bottles of Dr. King's New Discovery, taken in connection with Electric Bitters. We guarantee them always. Sold by S. J. Hodgkinson & Co.

David Kirkpatrick, an old resident of Portland, Oregon, killed himself last Monday.

SHILOH'S CURE will immediately relieve Croup, Whooping Cough and Bronchitis. Sold by Osburn & Shoemaker.

It is estimated that \$100,000 was paid for flowers in Boston on Easter.

The Poor Little Ones.

We often see children with red eruptions on face and hands, rough, scaly skin, and often sores on the head. These things indicate a depraved condition of the blood. The crowding period, children have need of pure blood by which to build up strong and healthy bodies. If the **Golden Medical Discovery** is given, the blood is purged of its bad elements, and the child's development will be healthy, and it should be. Scrofulous affection, rickets, fever-sores, hip-joint disease or other grave maladies and suffering are sure to result from neglect and lack of proper attention to such cases.

A Lovely Complexion.

What a lovely complexion on, we often hear persons say. "I wonder what she does for it?" In every case the purity and real loveliness of the complexion depends upon the blood. Those who have fair, blonde hair, may note the skin smooth and healthy by taking enough of Dr. Pierce's "Golden Medical Discovery" to drive out the humors lurking in the system.
